Feedback from our Academic Courses

PH Hidelberg 2019

Participants Testimonials

"You can use simple games and have that much impact. Children can get so much support in this way and learn strategies/methods for protect others and themselves by violence. I'm curious of testing the methods with own groups. It was great to play the games and to experience the results."

"I've learned that it's important for the children to explore problems and find a solution."

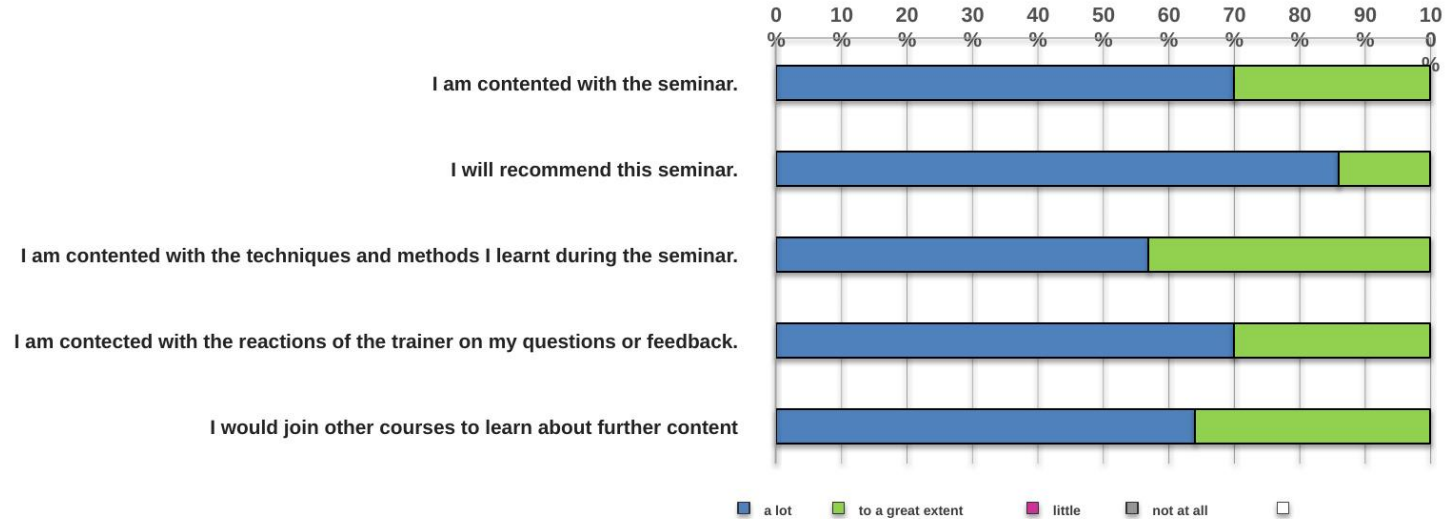

"Now I've learned a lot of new techniques, to work with children and not to work in an "autocratic" way rather to leading the topics and the flow."

"The most important thing I experienced during the seminar and which is probably also very important for youth & kids, is that I am not alone with my thoughts & feelings and that I can open up without greater fear. It was great that the whole seminar was so practical and included a lot of activities – I missed that a lot in my studies."

"I learned now to ask the "right" a bit manipulative questions. And I saw how much the children know and now they are often underestimated. I will take good care to always recognize their potentials & abilities."

"It was really a wonderful seminar. I am grateful that I participated and I will advertise for it. WELL DONE!"

EH Ludwigsburg 2019

Participants Testimonials

„The seminar has been one of the most valuable and useful activities that I have participated in the last 6 semesters.

„I was teaching in a lot of challenging and violent classes and didn't have a solution... - until now!!! “ 😊 „

A way to stop giving orders, but to give them support in reflecting their own behavior and discuss it open in classroom. An opportunity of implement a positive class climate. “

„Perceptions for my personal profession as educator. Methods, techniques and games for different purposes in school-life.

To ask the right questions in the right moments! It needs some practice, but it's completely worth it.“ „

Learnt to cope with violence/frustration. And I made the experience that children (a classroom) can be successfully in charge of the class-climate and against frustration.“
